Calibration Reviews

◇ Purpose
  – We're getting close to have DB's for a number of subdets.
  – CD+DO database groups will require a review to get into the integration DB

◇ What is it?
  – 2 phase review of each subdet.
    Phase 1: DB design (designer report), server, and RECO C++ access
    Phase 2: Online → Offline data xfer
  – Catch any intrinsic problems and get documentation

Calibration reviews, con't

- Preconditions for review
    - Need more in dbgen (2 wks)
    - Finish top level infrastructure (2 wks)
- Subdetector experts provide
    - Designer report
    - source code for reco access, server
    - probably 1 week in advance
- 1st phase:
    - Try to do one subdet/week. Start in mid Nov.
    - Committee: Barberis, Greenlee, Mayorov, Simmons(?), ??, (Hobbs, Yasuda)
